30/30

English:

good baseline (classifying everything as the majority class ;)

I like that you looked at what other people have already done with the dataset and that you also focused on feature engineering.

In general, a very nice project, you can see that you've been thinking about it as well and not just running library functions.

Slovak:

dobrý baseline (classifying everything as the majority class ;)

páči sa mi, že ste sa pozerali, čo už iní ľudia s daným data setom robili a že ste sa zamerali aj na feature engineering.

všeobecne, veľmi pekný projekt, vidno že ste nad tým aj rozmýšľali a nielen spúšťali knižničné funkcie.
